

TWICE THE ENVY!

EXTREME ENVY & ENVY TOUR PEARL

EXTREME ENVY

Big hook and no stop on the backend; that's Extreme Envy! Extreme Envy has a different core than the original Envy, this version of the Launcher core has a slightly lower RG and was created to match the Envy CF1 cover perfectly. Everything about this new Envy is Extreme; you'll be extremely happy with yours whenever you need lots of hook!

ENVY TOUR PEARL

We are excited to expand the Envy Tour line and introduce an Envy Tour Pearl that is longer, needs less oil, is still predictable, and always makes the move on the backend. The addition of HK22 poured in a chrome color, along with the performance you'd expect from an Envy Tour, makes this piece a must-have for every Hammerhead out there.
