

THE LEGEND CONTINUES **JACKAL GHOST V2**

HEAVY OIL

Some legends are never replaced. They are reborn to dominate in a new era! After nearly ten years, the longest running asymmetrical bowling ball in the bowling industry is getting an upgrade. The Jackal Ghost V2 is that carefully crafted update. The mission was simple: build a Jackal that rolls in 2026 the way the original Jackal Ghost rolled in January of 2017. And the Jackal Ghost V2 delivers. Sporting the same Predator V2 core as the Jackal Ghost, the Jackal Ghost V2 uses a stronger, enhanced Leverage HFS coverstock to combat modern oil conditions.

PREDATOR™ V2 ASYMMETRIC WEIGHT BLOCK

The Predator V2 core stays untouched in the new Jackal Ghost V2. When you have one of the most dominant asymmetrical cores ever created, you don't mess with it.

LEVERAGE™ HFS SOLID REACTIVE

The main upgrade to the original Jackal Ghost comes from new cover technology. The Jackal Ghost V2 is wrapped in an evolved Leverage HFS Reactive coverstock specifically engineered for modern oil volumes. The original Jackal Ghost eventually became too clean for today's heavier conditions. The new version fixes that problem without losing the legendary benchmark heavy oil motion that made the Jackal Ghost famous in the first place.

3000 GRIT LSS FINISH

A 3000 grit LSS finish gives the Jackal Ghost V2 plenty of bite on the lane, without reading too early. This finish helps to create a smooth, benchmark motion on the lane.
