

# GHOST LOCK™

## HAUNT THE COMPETITION

Greatness is achieved through countless hours of dedication and hard work. Storm understands the level of commitment that is required to perfect the craft of designing bowling balls. Through three decades of manufacturing, we certainly have seen our share of both successes and setbacks. It takes the lessons learned from both however to become the leader of bowling technology and innovation. We are Storm.

## LOCKED AND LOADED

As competitors, we rely on gaining true feedback from each shot. Relying on the signals given from how the ball reads the lane becomes imperative. Make no mistake, the type of ball used is equally critical. Ghost Lock will produce a visible, discernable motion that bowlers from all skill levels will appreciate.

Through its storied career, the RAD-X Core has established its reputation within the Storm ranks. Deriving from the famed origins of Radial Accelerating Disk™ technology, this weight block gives the bowler a fast, tight spin radius with no shortage of movement down the lane.

NRG-2 is Storm's second generation of Nanotechnology. Rebuilt from the ground up, this type of reaction will be familiar with enthusiasts, but provides a new type of reaction that will turn newcomers into believers. The polished finish on this ball was chosen to help the Ghost Lock glide through the front of the lane and react strongly to friction where and when it's needed. It truly is the perfect combination of midlane read and entry angle.

### TECHNICAL DATA

#### COVERSTOCK

*NRG-2™ Solid Reactive*

#### WEIGHT BLOCK

*RAD-X™ Core*

#### FACTORY FINISH

*1500-grit Polished*

#### BALL COLOR

*Black*

#### FLARE POTENTIAL

*High*

#### FRAGRANCE

*Plum Nectar*

“Greatness is achieved through countless hours of dedication and hard work. Storm understands the level of commitment that is required to perfect the craft of designing bowling balls.”
