DESIGN INTENT:

The Hy-Road 40 represents a throwback to the Hy-Road Pearl with a twist. At the heart of things is the venerable 2-piece Inverted Fe² Core. The very same found in all Hy-Road Series releases and the most successful core in the history of Storm. The A1S Pearl cover features one of the fastest oil absorption times across our family of brands. This helps the Hy-Road 40 combat the thicker oils of today while still providing that famous Storm backend shape.
