

Columbia 300 dominated the 90s with the most popular and best-performing bowling balls, and the brand has recently created a niche by modernizing those products for today's environment. The Power Torq, Messengers, and Cuda's have all done extremely well, they perform great, and bowlers love nostalgia. The Piranha line was unquestionably one of Columbia 300's most popular lines, and we're excited to bring back the name and original core shape with a few tweaks. The core is a dynamic two-piece core with the PowerCOR ball inside and has a high differential for more flare and hook. The Piranha PowerCOR features HK22 as a solid and is sanded at 2000; this cover and finish will give bowlers an advantage on any medium to heavy condition.

16-14 lb.
