LEVERAGE™ XFS SOLID REACTIVE

Bearing the legacy of its predecessors, Leverage XFS coverstock technology is built to dominate a modern environment. The new modifications made to Leverage technology digs in the oil, yet provides slightly more length and energy retention than the Jackal Ambush. This allows for more down lane motion and added versatility. This Leverage XFS creates a controllable, benchmark shape for high concentrations of oil.

2000 GRIT LSS FINISH

A 2000 grit LSS finish adds additional aggression when attacking the lanes. This finish helps to provide a strong and smooth motion even on the heaviest oil conditions.
