The least radical thing about the Sun Storm Limited Edition is its color. Quite possibly the most treasured core of professionals and amateurs around the world, the C³ Core is as forgiving as it gets. Whether you're drilling one or rolling one, the consistency of this core is second to none. SPEC stands for "Storm Performance Enhanced Coverstock". The intent behind this formula was to create something that withstands the rigors every bowling ball endures each time it takes a trip down the lane; namely, the friction and oil it encounters. With SPEC, you can expect consistent performance that is as tireless as it is dynamic.

It's bold, definite, and extremely potent.
