

!Q™ TOUR BLUE

THE GIFT THAT KEEPS ON GIVING

The premise is wickedly simple: create a ball that's worthy of your time, energy, and dollars. It's no mystery that the !Q has become a staple in Storm's lineup of high performance bowling balls. Favored by bowlers of all levels all over the globe, anyone and everyone can benefit from the benchmark reaction the !Q series is able to provide.

A BALL FOR ALL SEASONS

We're just like you. We've never been more excited about the game's latest equipment. We can't wait to toss every core, cover, and finish to create something unique to its own. The !Q Tour Blue is one of those balls that made it through our rigorous scrutiny that'll be a game-changer for you. We know it. We tried it. We're just like you.

Your favorite benchmark is back, but with a twist! R2X Solid Reactive is rarely seen in this series. We decided a bridge needed to be built between our beloved !Q Tour Edition and its more robust counterparts: Phaze™ II and Axiom™. What's been created is yet another distinct reaction that's sure to connect with many bowlers across a multitude of styles. More midlane, more backend, and still all-forgiving – exactly what the !Q series is renowned for.

Speaking of predictability, no core in bowling provides smooth, consistent ball reaction better than the C3 Centripetal Control core. That's why we placed that beauty at the heart of the !Q Tour Blue. After all, you can never have too much of a good thing!
